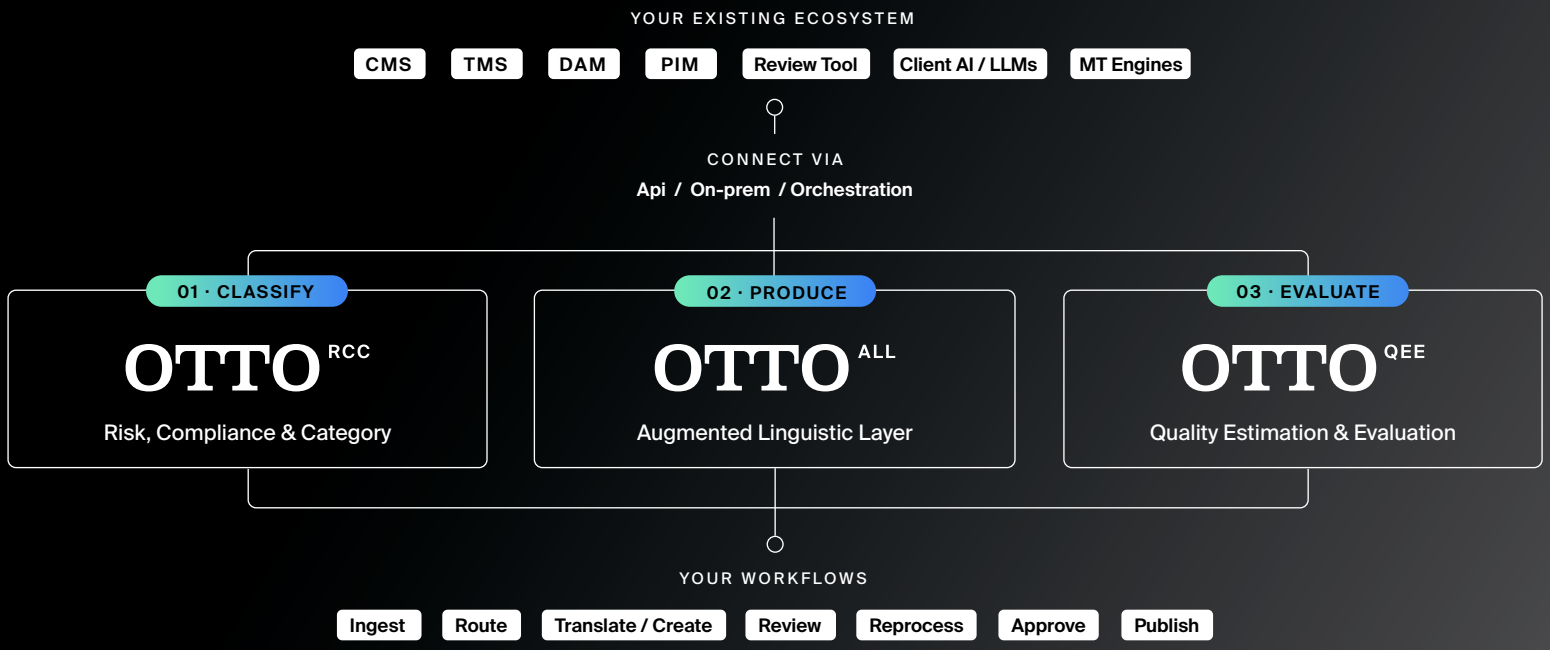
Keep your stack. Keep your AI. Add OTTO control.



THREE WAYS TO DEPLOY

1 Full Suite

Use OTTO end-to-end for a controlled multilingual content lifecycle.

RCC → ALL → QEE

Best for organizations modernizing their entire content pipeline.

2 Single agentic engine

Plug in the engine you need for targeted impact.

RCC | ALL | QEE

Ideal when you already have part of the stack and want to improve one step.

3 Bring your own AI

Use OTTO to govern, orchestrate, or evaluate your existing AI.

- CMS → RCC → Your AI workflow
- ALL → Your MT / LLM / Terminology
- Your AI / MT output → QEE → Decision

Perfect for organizations with investments in proprietary AI or models.

AGENT USE CASES & INTEGRATION EXAMPLES

OTTO RCC | CLASSIFY

Decide what gets automated, what needs control, and what requires human review.

CMS → RCC → Routing Decision

OTTO ALL | PRODUCE

Execute multilingual production with control, consistency, and brand alignment.

Content → ALL → Multilingual output

OTTO QEE | EVALUATE

Score every output and determine the next best action.

TMS / AI output → QEE → Approve / Review / Reprocess

BUILT FOR ENTERPRISE INTEGRATION

- API-First
- On-Prem / Private Cloud
- Orchestration Layer

OTTO does not replace your systems or your AI. It adds decision intelligence wherever the workflow needs it.

Before production RCC → During production ALL → After production QEE

Get started with OTTO today.
